

Dining hall extension or stand-alone canteen

We can build an extension to your current dining hall, seamlessly connecting it to your current facility. We can also place an extra stand-alone canteen on your grounds, which can have a separate, appropriately wide entrance, or be connected to your main building by way of a temporary corridor.

We are ready to help you get back in business as soon and as safe, as possible. Our structures are engineered, designed, produced and built by specialists at Losberger De Boer. Our buildings are modular by design, which means that they can be tailor-made to make maximum use of the space you have available.
